

Subject:	CCG Primary Care Report
Presented By:	Amanda Carver, Assistant Director, Primary Care
Submitted To:	Primary Care Joint Commissioning Committee 15 December 2016
Purpose of Paper:	Discussion

Delegated Commissioning

NHS Norwich, North Norfolk, South Norfolk and West Norfolk CCG's Heads of Primary Care meet on a fortnightly bases to discuss and plan for Full Delegated Commissioning, operating with the recommendations as laid out in the proposal for Full Delegated Commissioning submitted to and approved by respective CCG Governing Bodies and Council of Members.

Applications for Delegated Commissioning were submitted to the national team on 5 December and we expect to be notified of the outcomes January 2017.

The Heads of Primary Care are coordinating input from the various CCG functions to ensure we can make appropriate recommendations to our respective Governing Bodies on our capabilities to discharge the duties set out in the delegation agreement.

Due diligence points under consideration include:-

Governance

- Conflicts of interest
- Constitutional changes
- Recommend if forming a Committee in Common would be beneficial including terms of reference and membership advice
- Specific Practice issues for each CCG

Communications and Engagement

- LMC engagement
- Communication to the public to explain full delegation and the process around the meetings held in public
- Communication Practices around governance and process
- Communication to other local Providers

Capacity and Resource

Additional required staffing capacity for each CCG:-

- Potential assignment of local NHSE Primary Care team to Sustainable Transformation Plan (STP) footprint
- Mapping of what each CCG is currently doing and what can be shared
- Discussion on what can be done wider than the STP footprint

Finance

- Due diligence on level and scope of Primary Care budgets
- Consideration of future of car-hill weighting of practice populations and any future impact on Primary Care budgets
- Assessment of what should be risk shared across STP footprint
- Assessment of workforce capacity within the Finance teams

Five Year Forward View – New Models of Care

General Practice at Scale

In November the 23 out of 24 Norwich practices voted to be part of the OneNorwich Alliance and voting is currently underway to elect a GP Alliance a Chair, Vice chair, Lead Nurse, & Lead Practice Manager. Their role will be to formally create and construct a plan of the detailed vision already conceived out of the *New Model of Care Leadership group. This transformation plan for Norwich will have at its heart 3 principles:-

1. A funding mechanism that will not financially de-stabilise any part of Norwich general practice
2. A plan that allows Norwich General Practice to thrive not simply survive , that improves work life balance and places the patient at the centre of clinical decision making
3. External investment to enable fully integrated working to allow the true full potential on Norwich general practice to be realised.

**This was a group of volunteers who have worked with the support of the CCG to develop the framework for the OneNorwich Alliance.*

release.docx

Bowthorpe Care Village (BCV)

Training

Within Norfolk & Waveney STP, Bowthorpe Care Village has been designated a 'laboratory' site, where integrated service provision will be developed and evaluated. This includes a programme of training where care/nursing home staff will be upskilled via bespoke training packages. During October, partner CCG's across the STP geography worked with Health Education England & care home providers to confirm the syllabus of this training and the timescales for roll-out.

Dementia

An interim evaluation is in the progress by the lead GP for Primary Care at BCV focusing on screening and diagnosing patients with Dementia. The evaluation will consider the time, resources and skills required to complete the screening and how to manage the end result with the patients, carers and families and care home provider. The aim is to consider whether this approach can be replicated in Primary Care across Norwich.

Application from Roundwell Medical Centre to join Norwich CCG

We are currently waiting for written approval from NHSE which will give the HSCIC Organisation Data Service (ODS), the authority to move the hierarchy within the data files supporting the NHS and Social Care Services.

Recommendation:

To Note.
