

Subject:	NHS Norwich CCG – Primary Care Networks Update
Presented By:	Emma Bugg, Head of Primary Care
Prepared By:	Sadie Parker, Director of Primary Care, Great Yarmouth & Waveney CCG
Submitted To:	Primary Care Delegated Commissioning Committee 28th February 2019
Purpose of Paper:	The purpose of this paper is to advise PCCC chairs of a monitoring return required by NHS E, which was submitted for all five CCGs on the 31 st January 2019.
Summary	
<p>NHS E required all CCGs to submit a return by the 31st January 2019 to form baseline of the picture of Primary Care Networks (PCNs) across Midlands and East. This return was coordinated by GYW on behalf of the 5 CCGs in recognition that much of this information had already been provided to GYW to support the creation of documents as part of the Aspiring ICS programme.</p> <p>NHS E requires that PCCC chairs are sighted on the returns submitted to NHS E, as such the return for NHS Norwich CCG is attached.</p> <p>The recently published Long Term Plan sets out the requirements for the delivery of PCNs and this is accompanied by more detailed contractual guidance published on the 31st January 2019. The development and delivery will be a key focus for the STP over the coming months, working closely with GP Provider Organisations, as such a regular update will be provided to PCCCs going forward.</p>	
Recommendation:	
<p>Primary Care Commissioning Committee Chairs are invited to note this report. A regular update will be provided as a standing item at future meetings.</p>
