

NHS England CCG assessments

NHS England assesses CCGs against the Improvement and Assessment Framework for CCGs (the “CCG IAF”). For five years in a row, NHS Norwich CCG has been rated as “Good”

In total there are 60 indicators set across 29 areas. These indicators are reported quarterly. These indicators are captured within 4 domains:

1. **Better Health**- Improving the health and wellbeing of the population, bending the demand curve.
2. **Better Care**- Care redesign, performance of constitutional standards and outcomes.
3. **Sustainability**-Financial balance, value for money
4. **Leadership**- quality of plans, working with partners, governance arrangements in particular probity and conflicts of interest.

CCGs are also assessed against six clinical priority areas. The 60 indicators mentioned above cover these areas. A rating is given for each of the following 6 areas.

These are:

1. Mental Health
2. Dementia
3. Learning disabilities
4. Cancer
5. Diabetes
6. Maternity.

The possible ratings are: Outstanding, Good, Requires Improvement, Inadequate. These assessments are overseen by independent groups.

You can see the CCG’s current rating against all this indicators on the MyNHS webpages. The website also includes similar information for all CCGs in the country. The link to the website is:
