**Subject:** Buprenorphine new cheaper patches - Reletrans

**Dear REDCATED SECTION 40 PERSONAL DATA**  
I understand Reletrans are now the cheapest buprenorphine patch. This now gives us 2 cost effective options compared to Butrans / generic. Please can you confirm you are happy for me to add this new patch to your 16-17 Eclipse project.  
The other consideration is do we add all four strengths? Butrans and Butec do not make a 15mcg patch. I guess it is a step down option so perhaps should be included?  
Just to note we are struggling to find it on the clinical systems and have logged a call with the company asking why it is not available.  
Thanks
